

§ 136-92.1. Exemption from temporary driveway permitting for forestry operations.

Forestry operations and silviculture operations, including the harvesting of timber, and other related management activities that require temporary ingress from a property to State roads shall be exempt from the temporary driveway permit process of the Department for State roads, except for controlled access facilities, if the operator of the temporary driveway has attended an educational course on timbering access and obtained a safety certification. Driveway access points covered by this section shall be temporary and shall be removed upon the earlier of six months or the end of forestry or silviculture operations on the property. (2013-265, s. 17.)
