These methods and procedures include all activities associated with scientific resource conservation such as research, census, law enforcement, habitat protection, acquisition and maintenance, propagation, and transplantation into unoccupied parts of historic range. With respect to endangered and threatened species, the terms mean to use, and the use of, methods and procedures to bring any endangered or threatened species to the point at which the measures provided for the species are no longer necessary.
- (4) "Endangered species" means any species or higher taxon of plant whose continued existence as a viable component of the State's flora is determined to be in jeopardy by the Board; also, any species of plant determined to be an "endangered species" pursuant to the Endangered Species Act.
- (5) "Endangered Species Act" means the Endangered Species Act of 1973, Public Law 93-205 (87 Stat. 884), as it may be subsequently amended.

- (12) "Threatened species" means any resident species of plant which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range, or one that is designated as threatened by the Federal Fish and Wildlife Service. (1979, c. 964, s. 1.)

§ 106-202.13. Declaration of policy.

The General Assembly finds that the recreational needs of the people, the interests of science, and the economy of the State require that threatened and endangered species of plants and species of plants of special concern be protected and conserved, that their numbers should be enhanced and that propagative techniques be developed for them; however, nothing in this Article shall be construed to limit the rights of a property owner, without his consent, in the management of his lands for agriculture, forestry, development or any other lawful purpose. (1979, c. 964, s. 1.)
