§ 130A-221.5. Diabetes education as part of well-child care.

Each physician, physician assistant, or certified nurse practitioner who provides well-child care is encouraged to educate and discuss the warning signs of Type I diabetes and symptoms with each parent for each child under the care of the physician, physician assistant, or certified nurse practitioner at least once at the following age intervals:

- (1) Birth.
- (2) Twelve months of age.
- (3) Twenty-four months of age.
- (4) Thirty-six months of age.
- (5) Forty-eight months of age.
- (6) Sixty months of age. (2015-273, s. 1.)
