

§ 143-214.20. Riparian Buffer Protection Program: Alternatives to maintaining riparian buffers; compensatory mitigation fees.

(a) **Compensatory Mitigation for Riparian Buffer Loss.** – The Commission shall establish a program to provide alternatives for persons who would otherwise be required to maintain riparian buffers and who can demonstrate that they have attempted to avoid and minimize the loss of the riparian buffer and that there is no practical alternative to the loss of the buffer. This program is intended to allow these persons to perform compensatory mitigation in lieu of complying with laws and rules that require that riparian buffers be protected and maintained. All compensatory mitigation for riparian buffer loss shall be consistent with rules adopted by the Commission for protection and maintenance of riparian buffers.

(a1) **Compensatory Mitigation Options Available to Government Entities.** – A government entity, as defined in G.S. 143-214.11, may satisfy compensatory mitigation requirements by any of the following actions:

- (1) Payment of a compensatory mitigation fee into the Riparian Buffer Restoration Fund established in G.S. 143-214.21.
- (2) Donation of real property or of an interest in real property to the Department, another State agency, a unit of local government, or a private nonprofit conservation organization if both the donee organization and the donated real property or interest in real property are approved by the Department. The Department may approve a donee organization only if the donee agrees to maintain the real property or interest in real property as a riparian buffer. The Department may approve a donation of real property or an interest in real property only if the real property or interest in real property either:
 - a. Is a riparian buffer that will provide protection of water quality that is equivalent to or greater than that provided by the riparian buffer that is lost in the same river basin as the riparian buffer that is lost.
 - b. Will be used to restore, create, enhance, or maintain a riparian buffer that will provide protection of water quality that is equivalent to or greater than that provided by the riparian buffer that is lost in the same river basin as the riparian buffer that is lost.
- (3) Restoration or enhancement of an existing riparian buffer that is not otherwise required to be protected, or creation of a new riparian buffer, that will provide protection of water quality that is equivalent to or greater than that provided by the riparian buffer that is lost in the same river basin as the riparian buffer that is lost and that is approved by the Department.
- (4) Construction of an alternative measure that reduces nutrient loading as well or better than the riparian buffer that is lost in the same river basin as the riparian buffer that is lost and that is approved by the Department.
- (5) Participation in a compensatory mitigation bank if the Department has approved the bank and the Department approves the use of the bank for the required compensatory mitigation.

(a2) **Compensatory Mitigation Options Available to Applicants Other than Government Entities.** – An applicant other than a government entity, as defined in G.S. 143-214.11, may satisfy compensatory mitigation requirements by any of the following actions:

- (1) Participation in a compensatory mitigation bank if the Department has approved the bank and the Department approves the use of the bank for the required compensatory mitigation. This option is only available in a

hydrologic area, as defined in G.S. 143-214.11, where there is at least one compensatory mitigation bank that has been approved by the Department.

- (2) Payment of a compensatory mitigation fee into the Riparian Buffer Restoration Fund established in G.S. 143-214.21. This option only is available to an applicant who demonstrates that the option under subdivision (1) of this subsection is not available.
- (3) Donation of real property or of an interest in real property to the Department, another State agency, a unit of local government, or a private nonprofit conservation organization if both the donee organization and the donated real property or interest in real property are approved by the Department. The Department may approve a donee organization only if the donee agrees to maintain the real property or interest in real property as a riparian buffer. The Department may approve a donation of real property or an interest in real property only if the real property or interest in real property either:
 - a. Is a riparian buffer that will provide protection of water quality that is equivalent to or greater than that provided by the riparian buffer that is lost in the same river basin as the riparian buffer that is lost.
 - b. Will be used to restore, create, enhance, or maintain a riparian buffer that will provide protection of water quality that is equivalent to or greater than that provided by the riparian buffer that is lost in the same river basin as the riparian buffer that is lost.
- (4) Restoration or enhancement of an existing riparian buffer that is not otherwise required to be protected, or creation of a new riparian buffer, that will provide protection of water quality that is equivalent to or greater than that provided by the riparian buffer that is lost in the same river basin as the riparian buffer that is lost and that is approved by the Department.
- (5) Construction of an alternative measure that reduces nutrient loading as well as or better than the riparian buffer that is lost in the same river basin as the riparian buffer that is lost and that is approved by the Department.

(b) Compensatory mitigation is available for loss of a riparian buffer along an intermittent stream, a perennial stream, or a perennial waterbody.

(c) The Commission shall establish a standard schedule of compensatory mitigation fees for payments to the Riparian Buffer Restoration Fund pursuant to this section. The compensatory mitigation fee schedule shall be based on the area of the riparian buffer that is permitted to be lost and the cost to provide equivalent or greater protection of water quality in the same river basin as that provided by the riparian buffer this is lost by:

- (1) Restoration or enhancement of existing riparian buffers.
- (2) Acquisition of land for and creation of new riparian buffers.
- (3) Maintenance and monitoring of restored, enhanced, or created riparian buffers over time.
- (4) Construction of alternative measures that reduce nutrient loading.

(d) The Commission may adopt rules to implement this section. (1999-448, s. 1; 2009-337, s. 2.)
