33 a rule adopted by the Commission that has been in general use in this State for a minimum of  
34 five years may petition the Commission to have the system designated as an Accepted wastewater  
35 system as provided in this subsection. The manufacturer shall provide the Commission with the  
36 data and findings of all prior evaluations of the performance of the system in this State and other  
37 states referenced in the petition, including disclosure of any conditions found to result in  
38 unacceptable structural integrity, treatment, or hydraulic performance. In addition, the  
39 manufacturer shall provide the Commission with information sufficient to enable the  
40 Commission to fully evaluate the performance of the system in this State for at least the five-year  
41 period immediately preceding the petition. The Commission shall designate a wastewater  
42 dispersal system as an Accepted wastewater system only if it finds that there is clear, convincing,  
43 and cogent evidence based on actual field surveys and county activity reports (i) to confirm the  
44 findings made by the Department at the time the Department approved the system as a wastewater  
45 dispersal system and (ii) that the system performs in a manner that is equal or superior to a  
46 conventional or Accepted wastewater system under actual field conditions in this State. The  
47 Commission shall specify the circumstances in which use of the system is appropriate and any  
48 conditions and limitations related to the use of the system. However, the Commission shall not  
49 include more restrictive conditions and limitations established in the approval of a wastewater  
50 system as Accepted that are not included in the approval of the wastewater system as Innovative.

1 If the Department designates a wastewater dispersal system as an Accepted wastewater system  
2 pursuant to this section, the following shall apply:

3 (1) The approval shall be limited to the manufacturer who submitted the petition  
4 and received the Accepted status from the Commission.

5 (2) Neither the Commission, the Department, or any local health department shall  
6 condition, delay, or deny the substitution of any Accepted wastewater system  
7 based on location of nitrification lines when all parts of the dispersal field can  
8 be installed within the approved initial dispersal field area while complying  
9 with all Commission rules.

10 (i) Nonproprietary Wastewater Systems. – The Department may initiate a review of a  
11 nonproprietary wastewater system and approve the system for use as a provisional wastewater  
12 system or an innovative wastewater system without having received an application from a  
13 manufacturer. ~~The Department may recommend that the Commission designate a nonproprietary~~  
14 ~~wastewater system as an accepted wastewater system without having received a petition from a~~  
15 ~~manufacturer.~~

17 (j2) Clarification of Use of Native Backfill. – In considering the use of backfill material  
18 in subsurface trench dispersal products, neither the Commission nor the Department shall  
19 condition, delay, or deny the approval of a subsurface trench dispersal product based on a  
20 non-native backfill material requirement without the prior approval of the manufacturer. With  
21 respect to approvals already issued by the Department or the Commission that include conditions  
22 or requirements specifying the use of non-native backfill material, the Department or  
23 Commission, as applicable, shall reissue those approvals, at the written request of the  
24 manufacturer, without conditions or requirements relating to the use of non-native backfill  
25 material.
