

Whereas, the General Assembly endorses the findings of the Study; and
Whereas, effective implementation of mental health reform requires continuous legislative oversight to review and consider the recommendations of the Study and other matters and to recommend the necessary changes to State law and policy; Now, therefore,

The General Assembly of North Carolina enacts:

Section 1. Findings. – The General Assembly finds that:

- (1) The State and local government entities are not using effectively and efficiently available resources to administer and provide mental health, developmental disabilities, and substance abuse services uniformly across the State.
- (2) Effective implementation of State policy to assist individuals with mental illness, developmental disabilities, and substance abuse problems requires that a standard system of services, designed to identify, assess, and meet client needs within available resources, be available in all regions of the State.
- (3) The findings of recent comprehensive independent studies, and recent federal court decisions, compel the State to consider significant changes in the operation and utilization of State psychiatric hospital services.
- (4) State and local government funds for mental health, developmental disabilities, and substance abuse services must be committed on a continuing, stabilized basis and will need to be increased over time to ensure that the purposes of mental health system reform are achieved.
- (5) Reform of the State mental health, developmental disabilities, and substance abuse services system is necessary and should begin immediately. Reform efforts should focus on correcting system inefficiencies, inequities in service availability, and deficiencies in funding and accountability, and on improving and enhancing services to North Carolina's citizens.
