

NORTH CAROLINA GENERAL ASSEMBLY

Session 2019

Legislative Incarceration Fiscal Note

Short Title: Assault w/ Firearm on LEO/Increase Punishment.
Bill Number: House Bill 224 (First Edition)
Sponsor(s): Representatives Moore, Hastings, C. Smith, and Barnes

SUMMARY TABLE

FISCAL IMPACT OF H.B. 224, V.1 (\$ in millions)

	<u>FY 2019-20</u>	<u>FY 2020-21</u>	<u>FY 2021-22</u>	<u>FY 2022-23</u>	<u>FY 2023-24</u>
State Impact

Less Expenditures	-	-	-	-	-
General Fund Impact	No Estimate Available - Refer to Fiscal Analysis section				

NET STATE IMPACT

FISCAL IMPACT SUMMARY

The proposed bill may have a fiscal impact because of the application of a more stringent penalty for each offense. However, since there is limited data on this offense, or similar offenses to use as a proxy for predicting the total number of offenses, the Fiscal Research Division cannot reasonably estimate the total additional costs that may be incurred. The following costs may be incurred for every one person charged and convicted of this crime:

- Administrative Office of the Courts: \$4,905 per disposition
- Indigent Defense Services: \$1,283 per disposition
- Department of Public Safety (DPS) - Prisons: \$34,432
- DPS - Community Corrections: Minimum of \$6,720 per supervised probation sentence

FISCAL ANALYSIS

House Bill 224 amends G.S. 14-34.5(a) increasing the penalty for assaulting a law enforcement, probation officer, or parole officer while the officer is in the performance of their duties from a Class E to a Class D offense. The Sentencing Commission notes there were 6 convictions under G.S. 14-34.5 (a) which were Class E convictions. In addition, there were 3 convictions under G.S. 14-

34.5 but it is unknown how many of the convictions were for conduct covered by subsection (a). Because of the limited number of convictions, an impact projection using the prison projection model is not possible (see below for a threshold analysis). There would be an impact on the prison population if the Class E convictions became Class D convictions because of the higher rate of active sentences for Class D felonies. Class D convictions result in active sentences, whereas 60% of Class E convictions result in active sentences. In addition, Class D sentences are average of 64 months, whereas Class E sentences are an average of 28 months.

General

The Sentencing and Policy Advisory Commission prepares prison population projections for each bill containing a criminal penalty. The Commission assumes for such bills that expanding existing or creating new criminal offenses produces no deterrent or incapacitative effect on crime. Therefore, the Fiscal Research Division does not assume deterrent effects for any criminal penalty bill.

S.L. 2011-192, the Justice Reinvestment Act (JRA), made changes to North Carolina's court system, corrections system (both to prisons and probation), and to post-release supervision. All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses.

JRA also created the Statewide Misdemeanant Confinement Program (SMCP) for housing misdemeanants with sentences between 90 and 180 days in county jails (misdemeanants with shorter sentences were already the responsibility of the counties). County participation in the program is voluntary. The SMCP pays participating counties for misdemeanants' housing, transportation, and medical costs. In 2014, the program was expanded to include all misdemeanants with sentences longer than 90 days. The Sentencing and Policy Advisory Commission does not track county jail capacity, so it is not possible to estimate the impact of new or increased misdemeanor penalties on county jails.

Judicial Branch

The Administrative Office of the Courts provides Fiscal Research with a fiscal impact analysis for most criminal penalty bills. For such bills, fiscal impact is typically based on the assumption that court time will increase due to anticipated increases in trials and corresponding increases in workload for judges, clerks, and prosecutors. This increased court time is also expected to result in greater expenditures for jury fees and indigent defense.

Section One of the bill expands the penalty from a Class E to a Class D felony offense. AOC provides estimates of the average cost to the court for a charge by offense class. For every additional person charged with a Class D felony, the average cost to the court would be \$4,905.

The Office of Indigent Defense Services (IDS) provides Fiscal Research with the frequency and cost of indigent defense services for each level of crime, including the cost differentials for district and superior court with and without a trial and the percentage of cases handled in each category. Fiscal Research used this data to calculate a weighted average of IDS costs.

In FY 2017-18, the most recent year data is available, 89% of Class D felony cases were handled through IDS. The weighted average cost of a new Class D felony is \$961 per case for a private appointed counsel (PAC) attorney. This estimate assumes the appointment of a PAC attorney. In districts that have Public Defender offices, cases may be handled by those offices. In those instances, this cost may not be incurred.

Department of Public Safety – Prisons

The chart below depicts the projected inmate population relative to available prison bed capacity system-wide. Capacity projections assume operation at Expanded Operating Capacity,¹ and represent the total number of beds in operation, or authorized for construction or operation as of December 2018.

Based on the most recent population projections and estimated bed capacity, there are surplus prison beds available for the five-year fiscal note horizon and beyond. Therefore, no additional beds will be required unless the projected number of additional inmates resulting from a bill (row four) exceeds the projected number of beds under the inmate population (row three).

Population Projections and Bed Capacity Five Year Impact					
	June 30 2020	June 30 2021	June 30 2022	June 30 2023	June 30 2024
1. Inmates ²	36,452	36,867	37,231	37,433	37,702
2. Prison Beds (Expanded Capacity)	38,225	38,225	38,225	38,225	38,225
3. Beds Over/(Under) Inmate Population	1,773	1,358	994	792	523
4. Additional Inmates Due to this Bill³	No estimate available				
5. Additional Beds Required					

A threshold analysis is provided when it is not known how many offenders might be convicted and sentenced as a result of the proposed change. For each offense class, the threshold estimate is the number of convictions that result in the need for one prison bed in the first year.

¹ Expanded Operating Capacity (EOC) is: 1) the number of single cells housing one inmate, 2) the number of single cells housing two inmates, and 3) the number of beds in dormitories, allowing between 35 (130% of Standard Operating Capacity) and 50 (SOC) square feet per inmate.

² The Sentencing and Policy Advisory Commission prepares inmate population projections annually. These projections are derived from: historical information on incarceration and release rates under Structured Sentencing; crime rate forecasts by a technical advisory group; probation and offender revocation rates; and the decline (parole and max-outs) of the stock prison population sentenced under prior sentencing acts. Projections were updated in February 2019.

³ Criminal penalty bills effective December 1, 2019 should not affect prison population and bed needs until FY 2020-21 due to the lag time between offense charge and sentencing - six months on average. No delayed effect is presumed for the Court System.

In FY 2017-18, 99% of Class D felony convictions resulted in active sentences, with an average estimated time served of 64 months. Twelve months of post-release supervision is required upon release from prison following an active sentence or revocation of probation. The following table shows the estimated annual impact if there was one conviction (the threshold) or 20 convictions for this proposed offense per year. The five year estimate takes into account the combination of active sentences and probation and post-release supervision violations resulting in confinement, as well as growth rates adopted by the Sentencing Commission’s Forecasting Technical Advisory Group.

Estimated Prison Bed Impact Using Threshold Convictions and 20 Convictions Class D Felony					
Convictions	Year 1	Year 2	Year 3	Year 4	Year 5
2 (Threshold)	1	1	2	4	6
20	7	14	27	47	67
6	2	4	8	13	19
9	3	7	13	21	30

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$17.69 per day, or \$538 per month, which includes the cost of food, clothing, and health care. In FY 2017-18, 99% of Class D felony offenders received active sentences averaging 64 months. For every one Class D felony offender receiving an active sentence, the cost to the prison section will be \$34,432 (\$530 monthly cost times 64 months).

Department of Public Safety – Community Corrections

All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses. Additionally, for felony offense classes E through I, offenders may be given non-active (intermediate or community) sentences exclusively, or in conjunction with imprisonment (split-sentence). Sanctions include electronic house arrest, community service, substance abuse treatment, participation in educational or vocational skills development, payment of court costs, fines, and restitution, and short-term jail sentences not exceeding six days per month. All misdemeanor offenders may face the same non-active sentences as felons.

JRA essentially eliminated the distinction between “community” and “intermediate” supervision. Under structured sentencing, the two types of supervision were each defined by a set of specific sanctions. Under JRA, both community and intermediate probation may now include electronic monitoring, short-term periods of confinement, substance abuse assessment, monitoring, and treatment, participation in educational programs or vocational skills development. Whether a probationer is subject to more stringent conditions is determined by the results of a risk-needs assessment administered by the Department of Public Safety.

All types of post-release supervision are supervised by the Community Corrections Section (CCS); CCS also oversees community service. Supervision by a probation officer costs \$160 per offender per month; no cost is assumed for those receiving unsupervised probation or who are only ordered to pay fines, fees, or restitution. Total costs are based on average supervision length and the percentage of offenders (per offense class) sentenced to active sentences requiring post-release supervision and supervised probation.

In FY 2017-18, 99% of Class D felony offenders received active sentences. The average length of probation imposed for this offense class was 42 months. All active sentences for Class B1 through E felonies result in 12 months of post-release supervision (PRS). Therefore, at a minimum, one conviction resulting from this bill will require at least nine months of supervision. The cost of twelve months of supervision is \$1,920 per offender (\$160 per month times 12 months).⁴ For every offender sentenced to probation, the average cost would be \$6,720 (\$160 per month times 42 months).

Questions on this analysis should be directed to the Fiscal Research Division at (919) 733-4910.

LEGISLATIVE FISCAL NOTE– PURPOSE AND LIMITATIONS

This document is a fiscal analysis of a bill, draft bill, amendment, committee substitute, or conference committee report that is confidential under Chapter 120 of the General Statutes. The estimates in this analysis are based on the data, assumptions, and methodology described in the Fiscal Analysis section of this document. This document only addresses sections of the bill that have projected direct fiscal impacts on State or local governments and does not address sections that have no projected fiscal impacts. This document is not an official fiscal note. If a formal fiscal note is requested, please email your request to the Fiscal Research Division at FiscalNoteRequests@ncleg.net or call (919) 733-4910.

⁴ Due to the effective date of December 1, 2019 and the typical lag time between charge and conviction (6 months), little impact is assumed for CCS in FY 2018-19. Though some offenders may come under CCS supervision during this time, this note assumes an even entry over the course of FY 2019-20.
